## **DETAILED ACTION**

### ***Specification***

1. The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

### ***Information Disclosure Statement***

2. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over *Lannen et al.* (5,497,412) in view of Applicant Admission of Prior art.

As per claims 1-3, Lannen et al. disclosed a mobile station comprising a memory device for storing an IMEI code having at least six digit hexadecimal Serial Number (SNR) representation, wherein said SNR is used with a procedure so as to insure backwards compatibility with an existing installed base of mobile stations having a Binary Coded Decimal (BCD) SNR representation (see col. 18/ln. 47-53 and conversion Table below). Lannen et al. do not disclose a hexadecimal check digit calculation procedure. However, such hexadecimal check digit calculation procedure (modulus 16 check digit Luhn Algorithm) to convert hexadecimal digits to decimal digits and to calculate check bit is well known in the art, the examiner takes Official Notice as such, and admitted by Applicant as prior art (see specification, pg. 6/ln. 4-9). Therefore, it would have been obvious to one of ordinary skill in the art to provide such Luhn procedure, well known, to the procedure of Lannen et al. in order to verify the validity of the mobile stations.

***Allowable Subject Matter***

5. Claims 4-5 are allowed.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Gerba et al. (US2002/0040389A 1), Kulkarni et al. (5,862,481), Peterson (6,266,525), Comer (5,873,043), Sipila (6,081,534), Carson (6,134,309), Levine (6,076,121), Owens et al. (6,338,140), Wagner et al. (6,169,911), Metso et al. (5,920,826), and Schaupp, Jr. et al. (5,903,852) disclose communications system.
